

About Bestново

Bestново (Beijing) Medical Technology Co., LTD, founded in June 2013, is a National High-tech Enterprise, engaged in the third-party medical laboratory services and *in vitro* diagnostic product development and production. It consistently concentrates on the fields of cardio-cerebrovascular precision medicine and public health molecular diagnosis. In public health aspect, Bestново has 15-year professional experience in the R&D and production of disease control products, and possesses more than 100 products in pathogen detection so far. Successfully completed the R&D and application of the first batch of H1N1, MERS and other virus detection kits in China, Bestново has served tens of millions of people.

As a national brand enterprise with mission and responsibility, Bestново sticks to scientific and technological innovation and devotes itself into improving medical health services and safeguarding people's health together with all sectors of society. Currently, Bestново has several branches, including Bestново (Beijing) Medical Laboratory, Bestново (Jiangsu) Medical Technology co., LTD, etc.

Bestново (Jiangsu) Medical Technology Co., Ltd is a professional medical equipment production base certified by SFDA, owning a GMP standard workshop of 4000m². It has established three production lines for *in vitro* diagnostic reagents with a total productivity of 250 million servings per year. During the epidemic outbreak, Bestново (Jiangsu) has successfully developed "the Novel Coronavirus (SARS-CoV-2) Nucleic Acid Detection Kit (Fluorescent PCR)" and "the Novel Coronavirus (SARS-CoV-2) IgM and IgG Antibody Detection Kit (Colloidal Gold Immunochromatography)". Furthermore, together with ZGC Group, Bestново has donated the Novel Coronavirus (SARS-CoV-2) Nucleic Acid Detection Kit for 20,000-person test in batches to epidemic areas such as Hu Bei, Zhe Jiang, Chong Qing and designated hospital in Beijing.
